Ms. Dougherty,

Thank you for your prompt response. The Microsoft Word file appears to have incorrect symbols in the formulas; however the .pdf file seems to be okay. One can zoom in on the .pdf document to clearly see the superscripts and subscripts in the formulas. I hope this is sufficient.

Thank you,  
Pankaj Kumar

**Subject:** Soft copies for 09/921,508

**Examiner Kumar,**

Attached are soft copies of the original patent application for serial number 09/921,508. The original document was created in Lotus Word Pro (soft copy attached). We are also providing a converted version of the document, in Microsoft Word format as well as in .pdf format. Please note, however, that the pagination was affected by the format conversion. The formulae from page 15 of the Lotus Word Pro version of the document is now found on pages 14 and 15 of the Microsoft Word version of the document.

Please let me know if there is any problem with the provided information.

Thank you,

**Anne Dougherty**
